

MTU Detroit Diesel Australia

External Memorandum

Letter of Appreciation

To Instrowest,

I wish to thank Instrowest for the prompt, efficient and professional way they designed and installed the stand-alone instrumentation for MTUDDA's Bassendean Engine Dynamometer Facility. The system has been running for several months now without any problems. The system's design robustness and simplicity was a key feature for using Instrowest. Thanks again.

Kind regards,

Steve Filbey
