General Specifications

Model FLXA21 2-Wire Analyzer

GS 12A01A02-01E

■ General

The model FLXA[™]21 2-Wire Analyzer, one model of FLEXA[™] series, offers single or dual sensor measurement. The modular-designed analyzer offers 4 kinds of measurements – pH/ORP (oxidation-reduction potential), contacting conductivity (SC), inductive conductivity (ISC) or dissolved oxygen (DO) – with the respective sensor module.

For dual sensor measurement, the combination of two same type sensor inputs – pH/ORP and pH/ORP, SC and SC, and DO and DO – are available with two sensor modules. Dual sensor measurement offers additional functionalities; calculated data function and redundant system.

Variety of calculated data from two measuring parameters is selectable for each measurement. On the redundant system built on two measuring parameters of two sensor inputs, main output parameter is automatically switched over to the second sensor output in case of the main sensor's failure condition.

In the FLXA21 Human Machine Interface (HMI), 2-wire type analyzer FLXA21 offers easy touch screen operation and simple menu structure in 12 languages. Menus of display, execution and setting are displayed in a selected language.

The analyzer FLXA21 automatically recognizes the installed sensor module and prepares the necessary menus for right configuration, even for dual sensor measurement.

For immediate measurement, the FLXA21 offers quick setup functionality. The quick setup screen appears when the analyzer is powered. Only a few setups – date/time, language, basic sensor configurations and output – will start the measurement.

The FLXA21 offers the best accuracy in measurement with temperature compensation functionality and calibration functionality. Sensor diagnostics and sensor wellness indication make measurement reliable. Logbook of events and diagnostic data is a useful information source for maintenance.

For hazardous location, the FLXA21 has approvals of ATEX, IECEx, FM, CSA, NEPSI and KCs.

■ Features

- 4 kinds of measurements; pH/ORP, SC, ISC and DO
- Dual sensor measurement on 2-wire type analyzer; pH/ORP and pH/ORP, SC and SC, and DO and DO
- Calculated data from dual sensor measurement
- Redundant system on dual sensor measurement
- Easy touch screen operation on 2-wire type analyzer
- Simple HMI menu structure in 12 languages
- Quick setup menu for immediate measurement
- Indication of sensor wellness
- Hazardous location approvals ATEX, IECEx, FM, CSA, NEPSI and KCs

FLEXA, FLXA are trademarks or registered trademarks of Yokogawa Electric Corporation.

All other company and product names mentioned in this document are trademarks or registered trademarks of their respective companies.

Please select appropriate equipment in accordance with the laws and regulations of the relevant country/region, when it is used in a location where explosive atmospheres may be present.

■ General Specifications

1. Basic

■ Measurement Object/Sensor Type

- pH/Oxidation-reduction Potential (pH/ORP)
- Conductivity (SC)
- Inductive Conductivity (ISC)
- Dissolved Oxygen (DO)

Note: The available measurement object depends on a sensor module installed on the analyzer.

■ Analyzer Structure

Module structure

• Composition of Analyzer

One (1) Housing assembly

One (1) or two (2) Sensor modules

• Combination of Sensor Module when two modules are installed

Combinations of two same sensor modules are available;

pH/ORP and pH/ORP

SC and SC DO and DO

2. Measurement

pH/Oxidation-reduction Potential (pH/ORP)

■ Input Specification

Dual high impedance input (≥10¹² Ω)

■ Input Range

-2 to 16 pH pH: ORP: -1500 to 1500 mV 0 to 100 rH rH:

Temperature:

Pt1000: -30 to 140 °C -30 to 140 °C Pt100: -30 to 140 °C 6.8k: PTC10k: -30 to 140 °C NTC 8k55: -10 to 120 °C 3k Balco: -30 to 140 °C PTC500: -30 to 140 °C

Output Range

min. span 1 pH pH:

max. span 20 pH

ORP: min. span 100 mV

max. span 3000 mV min. span 2 rH

max. span 100 rH

Temperature: min. span 25 °C

max. span 170 °C

■ Performance (Accuracy)

(The specifications are expressed with simulated inputs.)

with Pt100

Linearity: ±0.4 °C Repeatability: ±0.1 °C Accuracy: ±0.4 °C

2-2. Conductivity (SC)

■ Input Specification

Two or four electrodes measurement with square wave excitation, using max 60m (200ft) cable (WU40/ WF10) and cell constants from 0.005 to 50.0 cm⁻¹

■ Input Range

Conductivity:

0 µS/cm min.:

200 mS x (Cell constant) max.:

(over range 2000 mS/cm)

Resistivity:

0.005 kΩ / (Cell constant) min.:

max.: 1000 MΩ x cm

Temperature:

-20 to 250 °C Pt1000: -20 to 200 °C Pt100: Ni100: -20 to 200 °C NTC 8k55: -10 to 120 °C

Pb36(JIS NTC 6k): -20 to 120 °C

Output Range

Conductivity:

min. 0.01 µS/cm

max. 2000 mS/cm (max 90% zero

suppression)

Resistivity:

min. $0.001 \text{ k}\Omega \text{ x cm}$

max. 1000 MΩ x cm (max 90% zero

suppression)

Temperature:

min. span 25 °C max. span 270 °C

■ Performance (Accuracy)

(The specifications are expressed with simulated inputs.)

Conductivity

2 μS x K cm⁻¹ to 200 mS x K cm⁻¹

Accuracy: ±0.5%F.S. 1 μS x K cm⁻¹ to 2 μS x K cm⁻¹

Accuracy: ±1%F.S.

Resistivity

 $0.005 \dot{k}\Omega$ / K cm⁻¹ to $0.5 M\Omega$ /K cm⁻¹

Accuracy: ±0.5%F.S. $0.5M\Omega$ / K cm⁻¹ to $1M\Omega$ /K cm⁻¹

Accuracy: ±1%F.S.

Temperature

with Pt1000, Pb36, Ni100 Accuracy: ±0.3 °C with Pt100, NTC 8k55

Accuracy: ±0.4 °C Temperature compensation

NaCl table: ±1 % ±3 % Matrix:

Step response: 90 % (< 2 decades) in 7 seconds Note: "F.S." means maximum setting value of analyzer output. "K" means cell constant.

YOKOGAWA provides conductivity sensors of which cell constants are 0.1 to 10 cm⁻¹

2-3. Inductive Conductivity (ISC)

■ Input Specification

Compatible with the Yokogawa inductive conductivity ISC40 series with integrated temperature sensor: NTC30k or Pt1000.

Input Range

Conductivity: 0 to 2000 mS/cm at 25 °C reference temperature.

Temperature: -20 to 140 °C

Cable length:

max. 60 meters total length of fixed sensor cable + WF10(J) extension cable. Influence of cable can be adjusted by doing an AIR CAL with the cable connected to a dry cell.

■ Output Range

Conductivity:

min. span: 100 μS/cm

max. span: 2000 mS/cm (max 90% zero

suppression)

Temperature:

min. span 25 °C max. span 160 °C

■ Performance (Accuracy)

(The specifications are expressed with simulated inputs.)

(Output span is 0-100 μS/cm or more)

Conductivity:

Linearity: $\pm (0.4 \text{ \%F.S.} + 0.3 \text{ }\mu\text{S/cm})$ Repeatability: $\pm (0.4 \text{ \%F.S.} + 0.3 \text{ }\mu\text{S/cm})$

Temperature: ±0.3 °C

Step response: 90 % (< 2 decades) in 8 seconds

Note: "F.S." means maximum setting value of analyzer
output.

2-4. Dissolved Oxygen (DO)

■ Input Specification

The FLXA21 accepts output from membrane covered Dissolved Oxygen sensors. These sensors can be Galvanic type, where the sensor generates its own driving voltage or Polarographic type, where the sensor uses external driving voltage from the converter.

The input range is 0 to 50 μ A for Galvanic sensors and 0 to 1 μ A for Polarographic sensors. For temperature compensation, the FLXA21 accepts Pt1000 (DO30 sensor) and NTC22k elements (OXYFERM and OXYGOLD sensors).

■ Input Range

Dissolved Oxygen: 0 to 50 mg/l (ppm)

Temperature: -20 to 150 °C

DO30G sensor:

Measurement range: 0 to 20 mg/l (ppm)

Temperature: 0 to 40 °C

Hamilton sensors:

Oxyferm:

Measurement range: 10 ppb to 40 ppm Temperature range: 0 to 130 °C

Oxygold G:

Measurement range: 2 ppb to 40 ppm Temperature range: 0 to 130 °C

Oxygold B:

Measurement range: 8 ppb to 40 ppm Temperature range: 0 to 100 °C

Output Range

DO concentration:

mg/l (ppm):

min.: 1 mg/l (ppm) max.: 50 mg/l (ppm)

ppb:

min.: 1 ppb max.: 9999 ppb

% saturation:

min.: 10 % max.: 600 % Temperature:

min. span 25 °C max. span 170 °C

■ Performance (Accuracy)

(The specifications are expressed with simulated inputs.)

Performance in ppm mode:

Linearity: ±0.05 ppm or ±0.8% F.S., whichever is

greater

Repeatability: ± 0.05 ppm or $\pm 0.8\%$ F.S., whichever

is greater

Accuracy: ±0.05 ppm or ±0.8% F.S., whichever is

greater

Performance in ppb mode:

Linearity: ±1 ppb or ±0.8% F.S., whichever is

greater

Repeatability: ±1 ppb or ±0.8% F.S., whichever is

greater

Accuracy: ±1 ppb or ±0.8% F.S., whichever is

greater

Temperature Linearity: ±0.3 °C

Repeatability: ±0.1 °C

Accuracy: ±0.3 °C

Note: "F.S." means maximum setting value of analyzer output.

3. Electrical

■ Output Signal

General: One output of 4-20 mA DC

Note: Tolerance: ±0.02 mA

Bi-directional HART digital communication,

superimposed on mA (4-20mA) signal

Output function:

Linear or Non-linear (21-step table)

Burn out function: (NAMUR 43 except ISC)

Without HART/PH201G:

Down: 3.6 mA

(signal: 3.8 to 20.5 mA for pH/ORP, SC

and DO)

(signal: 3.9 to 20.5 mA for ISC)

Ùp: 22mA

With HART/PH201G:

Down: 3.6 mA for pH/ORP, SC and DO

Down: 3.9 mA for ISC

(signal: 3.8 to 20.5 mA for pH/ORP, SC

and DO)

(signal: 3.9 to 20.5 mA for ISC)

Up: 22mA

Power Supply

Nominal 24 V DC loop powered system One (1) Sensor module (1 input):

16 to 40V DC (for pH/ORP, SC and DO) 17 to 40V DC (for ISC)

Two (2) Sensor modules (2 inputs):

22.8 to 40V DC (for pH/ORP, SC and DO)

Note: When the FLXA21 is used in the multi-drop mode of HART communication, the output signal is changed from 12.5 mA DC to 4 mA DC just after the power is turned on. Enough power supply for the instruments is to be provided.

• Maximum Load Resistance

Refer to the Figure 1.

Figure 1 Supply Voltage and Load Resistance

Display

LCD with a touch screen:

Black/White: 213 x 160 pixels

Contrast adjustment available on the touch screen Message language:

12 (English, Chinese, Czech, French, German, Italian, Japanese, Korean, Polish, Portuguese, Russian and Spanish) One analyzer has all 12 languages.

Note: Description for a selection of language and language names are written in English.

Note: Only English alphabet and numeric are available for a tag number, an additional description for each value on the display screen and passwords.

Note: Only for message language on the screen, 12 languages are provided.

4. Mechanical and others

Housing

Plastic (Polycarbonate) Case:

Case color and finish:

Silver gray (equivalent to Munsell 3.2PB7.4/1.2) Color:

Window: Polycarbonate (flexible)

Protection: IP66 (except Canada), NEMA Type 4X (USA), CSA Type 3S/4X (Canada)

Plate

Main name plate: inside case cover Regulation plate:

on the case outside

Cable and Terminal

Cable size:

Outer diameter:

6 to 12 mm (suitable for M20 cable gland)

3.4 to 7 mm (grounding cable for plastic case)

Terminal screw size: M4

torque of screw up: 1.2 N·m

Wire terminal:

Pin terminal, ring terminal and spade terminal can be used for analyzer's power supply terminals and sensor terminals. Pin terminal: pin diameter: max. 1.9 mm Ring and spade terminal: width: max. 7.8 mm

Cable Entry

1-Sensor measurement:

3 holes.

M20 cable gland x 3 pcs,

Sleeve x 1 pc (for grounding cable line)

2-Sensor measurement:

4 holes

M20 cable gland x 4 pcs,

Sleeve x 1 pc (for grounding cable line)

Note: Cable glands are delivered with an analyzer, but not assembled into the analyzer.

Mounting

Mounting hardware (option):

- Universal mounting kit (Note)
- Pipe and wall mounting hardware
- Panel mounting hardware

Note: This kit contains the pipe and wall mounting hardware and the panel mounting hardware. Hood (option):

- Stainless steel
 - · Stainless steel with urethane coating
 - · Stainless steel with epoxy coating

■ Stainless Steel Tag Plate

When the additional code "/SCT" with a tag number is specified, the tag plate on which the tag number is inscribed is delivered with the analyzer. Tag plate is hanging type.

Conduit Adapter

Using optional adapter

- G1/2 (quantity: 4)
- 1/2NPT (quantity: 4)
- M20 x 1.5 (quantity: 4)

These conduit adapters are delivered with an analyzer, but not assembled into the analyzer.

Size of Housing Case

144 (W) x 144 (H) x 151 (D) mm (without cable gland)

Weight

Approx. 1 kg

Ambient Operating Temperature

-20 to +55 °C

Storage Temperature

-30 to +70 °C

Humidity

10 to 90% RH at 40°C (Non-condensing)

5. Digital Communication

■ Kind of Digital Communication

 HART (HART 5) or PH201G dedicated distributor Note: Only one kind of digital communication is available for one analyzer.

■ Output Value Parameter (HART)

Four value parameters (measured values) are available for one digital communication.

- For 1-sensor measurement, these parameters are measured values.
- For 2-sensor measurement, refer to the next item.

Digital Communication of 2-Sensor Measurement (HART)

Even when two sensor modules are installed, only one digital communication is available for 2-sensor measurement.

Four value parameters can be selected from the followings;

Measured values of two sensors Calculated data of 2-sensor measurement Redundant system output

Specific Contact Output with dedicated distributor, model PH201G

The distributor, model PH201G, is designed to connect with the 2-Wire Analyzer.

This distributor supplies drive power to the analyzer and receives simultaneously 4-20 mA DC signal from the analyzer.

This signal is converted to 1-5 V DC signal in the distributor.

This distributor also receives digital signals superimposed on the 4-20 mA DC signal, and provides contact outputs Input/Output signal:

Number of available drive/signal point: 1
Output signal: 1-5 V DC (2 points) (Note)
Load resistance: 2 kΩ or less (1-5 V DC output)
Isolation system: Loop isolation type

Note: Two output signals for one analyzer's analog output are provided. Two 1-5 V DC output signals are same. Contact output:

Contact rating:

250 V AC, maximum 100 VA 220 V DC, maximum 50 VA

Hold contact output:

NC contact, normally energized Contact closes when power is off or during Hold situation.

Fail contact output:

NC contact, normally energized Contact closes when power is off or during Fail/Warning conditions.

Wash contact output:

NO contact

Contact closes during wash cycles.

■ Regulatory Compliance (FLXA21)

■ Safety, EMC and RoHS Compliance

Safety: UL 61010-1

UL 61010-2-030

NM EN 61010 1, NM EN 61010 2 030

GB30439 Part 1

CAN/CSA C22.2 No.61010-1 CAN/CSA-C22.2 No.61010-2-030

EN 61010-1

EN IEC 61010-2-030

EMC: EN 61326-1 Class A, Table 2 (For use in

industrial locations) EN 61326-2-3

NM EN 61326 1, NM EN 61326 2 3 RCM: EN 61326-1 Class A, Table 2 Korea Electromagnetic Conformity Standard Class A 한국 전자파적합성 기준

Russian: TR CU 020/2011

RoHS: EN IEC 63000 (Style 3.06 and later)

Installation altitude: 2000 m or less Category based on IEC 61010: I (Note 1)

Pollution degree based on IEC 61010: 2 (Note 2)

Note 1: Installation category, called over-voltage category, specifies impulse withstand voltage.

Equipment with "Category I" (ex. two wire transmitter) is used for connection to circuits in which measures are taken to limit transient over-

voltages to an appropriately low level.

Note 2: Pollution degree indicates the degree of existence of solid, liquid, gas or other inclusions which may reduce dielectric strength. Degree 2 is the normal indoor environment.

Information of the WEEE Directive

This product is purposely designed to be used in a large scale fixed installations only and, therefore, is out of scope of the WEEE Directive. The WEEE Directive does not apply. The WEEE Directive is only valid in the EU.

REACH: Regulation EC 1907/2006

- tes:

 The associated apparatus must be a linear source.

 "Measuring Module 2" is not always installed.

 "Measuring Module 2" is not always installed.

 ISC module, SENCOM module and SSA module are not installed as "Measuring Module 2".

 Sensor 1 and Sensor 2 may be simple apparatus or intrinsically safe apparatus.

 In case of SSA module, Sensor 1 is SENCOM SA (SENCOM Smart Adaptor).

 When accessing the display window or other non-metallic parts of the enclosure of
- electrostatic discharges, in addition to avoiding any actions that cause the generation of FLXA202/FLXA21, take the following measures to minimize the risk of explosion from

electrostatic charges, such as rubbing with a dry cloth.

To avoid electrostatic charge on the operator,
Earth the operator through a wrist-strap, or
Operate FLXA202/FLXA21 on the conductive floors, wearing anti-static work clothes

and

Neutralize the operator and FLXA202/FLXA21 by a static elimination bar which has a

electrostatic safety shoes, or

In case that those measures cannot be taken or static electricity cannot be suppressed, bring a gas detector and make sure there is no ignition capable atmosphere around FLXA202/FLXA21 before the operation. metal part earthed through resistor from $100k\Omega$ to $100M\Omega$.

(2) **US** and Canada Intrinsic safety, Nonincendive

Specific conditions of use:

Precautions shall be taken to minimize the risk of non-metallic parts and painted parts of the enclosure. When the equipment is used in hazardous locations, avoid any action which generates electrostatic discharge such as rubbing with a dry cloth.

In the case where the enclosure of the analyzer is made of Aluminum, if it is mounted in ZONE 0, it must be installed such that, even in the event of rare incidents, ignition sources due to impact and friction sparks are excluded.

Notes:

- 1: The type "-AQ" is General purpose type of EAC. The sales area is limited to Russia.
- 2: The type "-AR" is General purpose type of EAC without any pattern approval for Kazakhstan and Belarus. The sales area is limited to Belarus and Kazakhstan.
- 3: The type "-CB" intrinsic safety type of ATEX and IECEx. Temperature class is T4. Product registration is done by Yokogawa Taiwan Corporation as an importer in Taiwan.
- 4: The type "-CD" is intrinsic safety of US and Canada, and non-incendive of US and Canada. Temperature classes are T4.
- 5: The type "-CH" intrinsic safety type for NEPSI. Temperature class is T4.
- 6: The type "-EG" intrinsic safety type of KCs for Korea. Temperature class is T4.
- 7: The type "-EQ" intrinsic safety type of EAC with Pattern Approval for Russia. Temperature class is T4. The sales area is limited to Russia.
- 8: The type "-ER" intrinsic safety type of EAC without any pattern approval for Kazakhstan and Belarus. Temperature class is T4. The sales area is limited to Belarus and Kazakhstan.
- 9: The type "-DD" nonincendive type for US. Temperature class is T4.
- When a 2nd input is selected, only the same kind of the 1st input is available.
 For example, when a 1st input is "-P1", the 2nd input must be the same "-P1".
 The combination of ISC and ISC is not available.
- 11: The FLXA21 has other output types of "FOUNDATION Fieldbus" communication (suffix code: -F) and "PROFIBUS PA" communication (suffix code: -P). Refer to GS 12A01A02-71E and GS 12A01A02-72E.

- 12: These languages are message languages on the analyzer's display. One analyzer has English and 11 languages. All languages are as follows; English, Chinese, Czech, French, German, Italian, Japanese, Korean, Polish, Portuguese, Russian and Spanish.
- 13: When an analyzer is used in Japan, it must meet the Japanese Measurement Law.
- Only SI units must be used on the analyzer and its documents in Japan.

 The universal mounting kit contains the pipe and wall mounting hardware (/U) and the panel mounting hardware (/PM). 14:

■ Dimensions and Mounting

Conduit Adapter (Option code: □/CB4, □/CD4, □/CF4)

(Note) The universal mounting kit (/UM) contains the pipe and wall mounting hardware (/U) and the panel mounting hardware (/PM).

Panel mounting hardware (Option code: □/PM, □/UM)

Wall mounting hardware (Option code: □/U, □/UM)

Note: The wall on which the analyzer is mounted should be strong enough to bear the weight of more than 8 kg.

Pipe mounting hardware (Option code: □/U, □/UM)

■ Wiring Diagrams

- *1: Use a 2-wire shielded cable with an outside diameter of 6 to 12 mm.
- *3: This line is connected to a distributor or 24V DC power supply.
- *4: Terminal numbers for each sensor module are shown below.
- *5: Two modules of the same kind of measurement/sensor type can be installed. When measuring inductive conductivity, only one module can be installed.
- *6: The terminal box may be necessary depending on the sensor cable length and the distance between the analyzer and the sensor.
- *7: Two outputs, output 1 and output2, of PH201G or SDBT are same signals.

Distributor

The distributor PH201G designed exclusively for use with the 2-wire analyzer, supplies drive power to the 2-wire analyzer while simultaneously receiving 4 to 20 mA DC current signal from the analyzer and converting it to 1 to 5 V DC voltage signal; it also simultaneously receives a digital signal superimposed on 4 to 20 mA DC signal, and provides contact outputs during hold, failure, and/or cleaning. A current limiter function is built into the distributor so it can continue to operate properly even with a short circuit on the transmitter side.

Standard Specifications

<Input/Output Signal Specifications>

Number of input points

(Number of transmitter units connectable):1 point

Output signal: 1 to 5 V DC (2 points)

Load resistance: 2 kΩ or less (1 to 5 V DC Output)

Isolation system: Loop isolation type

<Mounting/Form>

Mounting method: Indoor rack mounting

Connection method:

External signal connection; M4 screw terminal

connection

Power supply/Ground connection:

100 V: JIS C8303 ground type 2 plug connection 220 V: CEE 7VII (European electrical device

standard) plug connection

Cable length: 300 mm

External dimensions: 180H x 48W x 300D mm Weight: Approx. 1.7 kg (Including rack and case)

<Standard Specifications>

Accuracy: ±0.2 % of span

Analyzer supply voltage: 26.5 ± 1.5 V DC

Insulation resistance

Between I/O terminals and ground pin:

100 MΩ/500 V DC

Between power supply pins and ground pin:

100 MΩ/500 V DC

<Operating Specifications>

Ambient temperature: 0 to 50 °C

Ambient humidity: 5 to 90 % RH (Non-condensing)

Power supply: Dual use AC/DC

100 V: DC power 20 to 130 V, no polarity

AC power 80 to 138 V, 47 to 63 Hz

220 V: DC power 120 to 340 V, no polarity

AC power 138 to 264 V, 47 to 63 Hz

Maximum current and power consumption

24 V DC: Approx. 200 mA 100 V AC: Approx. 7 VA 220 V AC: Approx. 11 VA

<Contact Output>

Contact rating: 250 V AC, maximum 100 VA 220 V

DČ, maximum 50 VA

Hold contact output: 1 contact, Normally energized

Contact closes when power is

off or during maintenance.

Failure contact output: 1 contact, Normally energized

Contact will close when power

is off or during the failure. Cleaning contact output: Close during cleaning only

Used as drive contact for solenoid valve for cleaning.
