

Instrowest was established in 2006 to provide quality instrument and electrical contracting services to the mining and mineral processing industries, with a strong focus upon safety. Instrowest can provide a comprehensive installation, maintenance, calibration, and repair service to all sites within Western Australia. Instrowest can also help in solving any instrument or control related problem that you may be facing.

At Instrowest we are committed to providing reliable, high quality sales and service while maintaining respect, integrity and trust to our clients and those within our organisation. We aim to provide this service by understanding our client's needs, wants and constraints while finding a solution that is fit for purpose.

At Instrowest we will always maintain an innovative approach that sets us apart from others; if a traditional method is not suitable or ineffective, we will endeavor to find an alternative or innovative approach to achieve our client's goals.

Kewdale Hire, VEI Helper X Install.

Instrowest was approached by Kewdale Hire to supply and install an onboard weigh scale system on one of their front end loaders located approximately 400km South East of Perth.

The client was loading and hauling road-trains to assist with the upgrade of the wheat belt train line in Buniche. Urgency was placed on the installation of an onboard scale for the accurate loading of trucks, with this in mind Instrowest was able to attend site the following day, install and commission the VEI onboard scale unit ready for use.

Installation of the unit took approximately 12hrs from start to finish. Calibration of the VEI on-board weigh scale was done at a local weighbridge using a material calibration method.

Once installed, Instrowest was able to fully customize the unit based on the client's needs. The operator was given training on the unit, its operating capabilities and calibration of the unit.

This loader has since moved to another site, Instrowest has provided training to the new operator, and reconfigured the system to suit the new client's needs.

Instrowest is proud to be the West Australian Service Agent and distributor for VEI On-board weighing systems, Designed and Manufactured in Italy; VEI offers operators an easy to use compact on-board weighing system with a huge range of functions for use on all Front End Loaders and other mobile machinery.

With input from Instrowest this product has been equipped for the Australian Mining Industry.

No longer will you be locked out from your own equipment or trapped in service contracts

Instrowest can provide full access to plant owners (if required) for calibration and maintenance. Instrowest offers installation, calibration, maintenance and training options for the VEI on-board weigh scale systems to suit your needs.

With two models available, the Millennium 5 and the Helper X, VEI enables your business to choose the right product for your application.

Results

As a result, Cardinals Contractors were able to accurately load their road trains for the duration of the project without the risk of overloading or under loading their trucks and optimising performance.

This was great outcome for Kewdale Hire, Cardinals Contractors and Instrowest.

If you would like Instrowest to assist you with your onboard weighing requirements please contact Instrowest.
